NOTICE OF ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record Lundstrom et al. (US 2002/0183040) teaches a call cross-charging in a mobile telecommunication network wherein a caller (a first subscriber) can send or generate a SMS or USSD and send it to a second party (a party to be called) through a network element concerning the need to accept charges for a call to be made and if the second party (called party) accepts the request, then a network element can send a notification message to the first party (caller) that the second party (called party) has accepted the cost transfer request. Afterwards, the first subscriber (caller) can be presented with a continue with the call option to make a call which originates from the first subscriber who initially sent the SMS or USSD to the second party (party to be called).

Borsan (US Pat# 2004/0063432) teaches a sender address based telecommunication operator callback system and method, which can be used in making collect calls, and also, provides SMS.

The difference between the prior art of record and that of the invention is that the first party sends a SMS or USSD to the second party through a network element about a collect call request and if the second party accepts such a request, originating a call from the second party to the first party in the form of a callback.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
